Projects

ChatBi App - chat application

- Real-Time Messaging with Firebase: The chat application leverages Firebase's real-time database to allow users to send and receive messages instantly, ensuring a smooth and responsive communication experience.
- Scalable and Efficient with ReactJS: ReactJS is used to build a dynamic and highly responsive user interface.
- Easy User Authentication and Data Management: Firebase Authentication enables secure and easy sign-up/login processes, while Firebase's Firestore database is used to store user data and chat messages.

STYL.myj - Ecommerce Platform

- Dynamic and Interactive User Interface: Using ReactJS, React's component-based architecture allows for dynamic updates to the UI without full-page reloads, ensuring a fast and smooth browsing experience. This enables seamless interactions like product filtering, sorting, and real-time updates to the shopping cart, enhancing customer satisfaction.
- Improved Performance with React's Virtual DOM: React's Virtual DOM ensures optimal performance by updating only the parts of the UI that change, rather than re-rendering the entire page.
- Scalability and Maintainability: With React's modular structure, the eCommerce site is easy to scale and maintain. New features, such as advanced search functionality, personalized recommendations, or multi-language support, can be added with minimal disruption to the existing codebase.

Educational Background

Bachelor of Science In Computer Science

Bishop Ambrose College - Coimbatore
Bharathiar University
Batch : **2021 - 2024**

CGPA :- 7.5

Contact
